### Event

Qmines has released results from its drilling program at the Mount Chalmers copper project in Queensland. The company has encountered high grade mineralisation outside the existing Resource and looks on track to announce a resource upgrade before the end of CY21. The recent intercepts appear higher grade in zinc and lead than the existing resource, which is positive, but may add complexity to the ultimate development plans.

### Highlights

- Qmines holds a 100% interest in the Mount Chalmers project, located approximately 17km north-east of Rockhampton in Queensland. It is a historic copper/gold mine that operated sporadically between 1898 and 1982. Historical production totalled 1.24Mt @2.0% Cu, 3.6g/t Au and 19g/t Ag. The mine had both underground and open pit operations, with 810kt produced from open pit and 430kt from underground operations.
- Mount Chalmers currently has an inferred resource of 3.9Mt @ 1.15% Cu, 0.81g/t Au and 8.4g/t Ag for 71kt of contained copper equivalent. Qmines has an objective of increasing the resource to around 200kt of copper equivalent over the next two years through a 30,000m drilling program.
- The company has today announced the results of 35 holes totalling 3,498m of drilling. The 30,000m drilling program is ongoing with two rigs active. High grades have been intersected in multiple drill holes including;
  - 41.51 g/t Au and 7.16% Cu from hole MCDD017,
  - 17.4 g/t Au and 5.13% Cu from hole MCDD018,
  - 2.45 g/t Au and 11.65% Cu from hole MCDD015, and
  - 7.2g/t Au, 224g/t Ag, 6.18% Pb and 33.9% Zn from hole MCRC001.
- The mineralisation has been encountered outside the existing resource which remains open in all directions. Qmines has drilled several of these holes in previously untested area on the western side of the main pit. These results are highly encouraging and suggest Qmines is on-track for a resource upgrade before the end of CY21 as planned.
- Mt Chalmers is a Volcanic Hosted Massive Sulphide (VHMS) deposit. These deposits are typically characterised by multiple deposits within a cluster. Qmines technical team believe there is strong potential of finding further VHMS mineralisation around the existing mine site.
- The exploration program has three main components; increasing the size of the existing Mount Chalmers main resource, drilling near mine exploration targets, and discovering additional VHMS deposits in the region.
- Qmines is exploring for additional mineralisation near the existing Mount Chalmers open pit, particularly along strike and down-dip of the existing resource. The company has advanced exploration targets at Woods Shaft, Botos and Mt Warminster.
- Qmines has reworked and digitised historical soil sampling in the region and has identified four strong exploration leads at Striker, and at three locations to the west of Mount Chalmers (T1, T2 and T3).

### Recommendation

We recently initiated coverage on Qmines (QML:ASX) with a Buy recommendation and 69cps price target which we today increase to 72cps. Our price target is set based on an EV/resource multiple benchmarked against a range of copper exploration peers. We assume Qmines successfully increases the resource to 120kt of contained copper and we use a A\$589/t multiple which is in-line with the peer average.

## QMines

QMines IPO'd on the ASX on May 6<sup>th</sup>, raising \$11.55m at \$0.30ps to fund exploration at its flagship Mount Chalmers copper project in Queensland.

QMines holds a 100% interest in the Mount Chalmers project, located east of Rockhampton in Queensland. The Mount Chalmers copper and gold mine produced 1.24 Mt @ 2.0% Cu, 3.6g/t Au and 19g/t Ag during periodic mining between 1898 and 1982.

Mount Chalmers currently has an inferred resource of 3.9Mt @ 1.15% CU, 0.81g/t Au and 8.4g/t Ag for 71kt of contained copper equivalent.

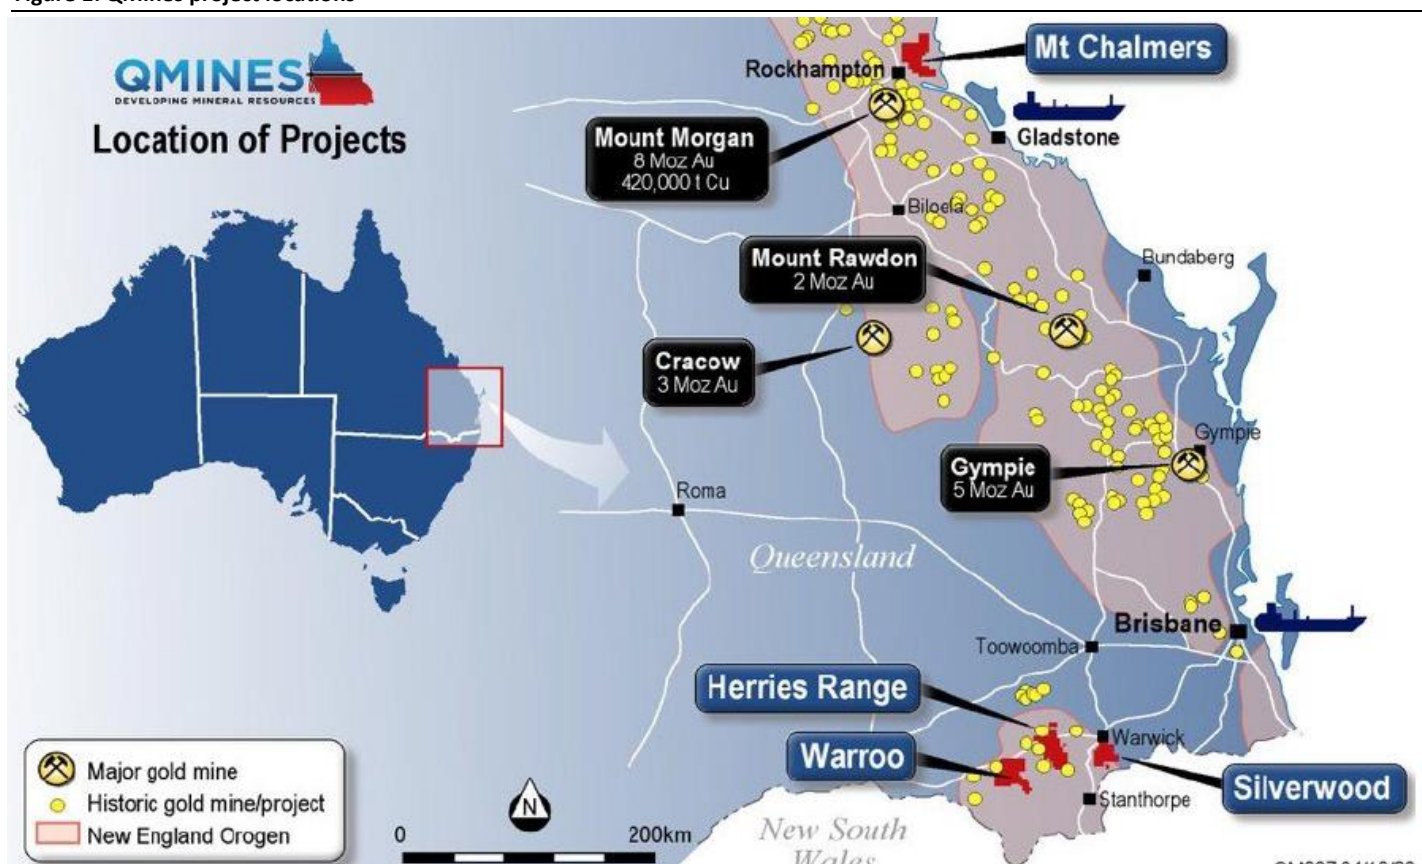

Mt Chalmers is a Volcanic Hosted Massive Sulphide (VHMS) deposit. These deposits are typically characterised by multiple deposits within a cluster. QMines technical team believe there is strong potential of finding further VHMS mineralisation around the existing mine site.

The Company also holds a 100% interest in the Silverwood, Warroo and Herries Range projects located south west of Brisbane in Queensland. These projects are at an earlier stage than Mount Chalmers.

Exploration has commenced at Mount Chalmers, with the company recently completing an 11 hole 1,575m diamond drilling program. The results were highly encouraging and were well received by the market.

The copper price is currently trading at US\$9,091/t and so the IPO of QMines appears well timed. There are very few ways for investors on the ASX to gain exposure to copper outside of the major diversified miners and larger companies such as Oz Minerals and Sandfire.

Figure 1: QMines project locations

### Mount Chalmers Copper Project

Mount Chalmers is located approximately 17km north-east of Rockhampton in Queensland. It is a historic copper/gold mine that operated sporadically between 1898 and 1982. Historical production totalled 1.24Mt @ 2.0% Cu, 3.6g/t Au and 19g/t Ag. The mine had both underground and open pit operations, with 810kt produced from open pit and 430kt from underground operations.

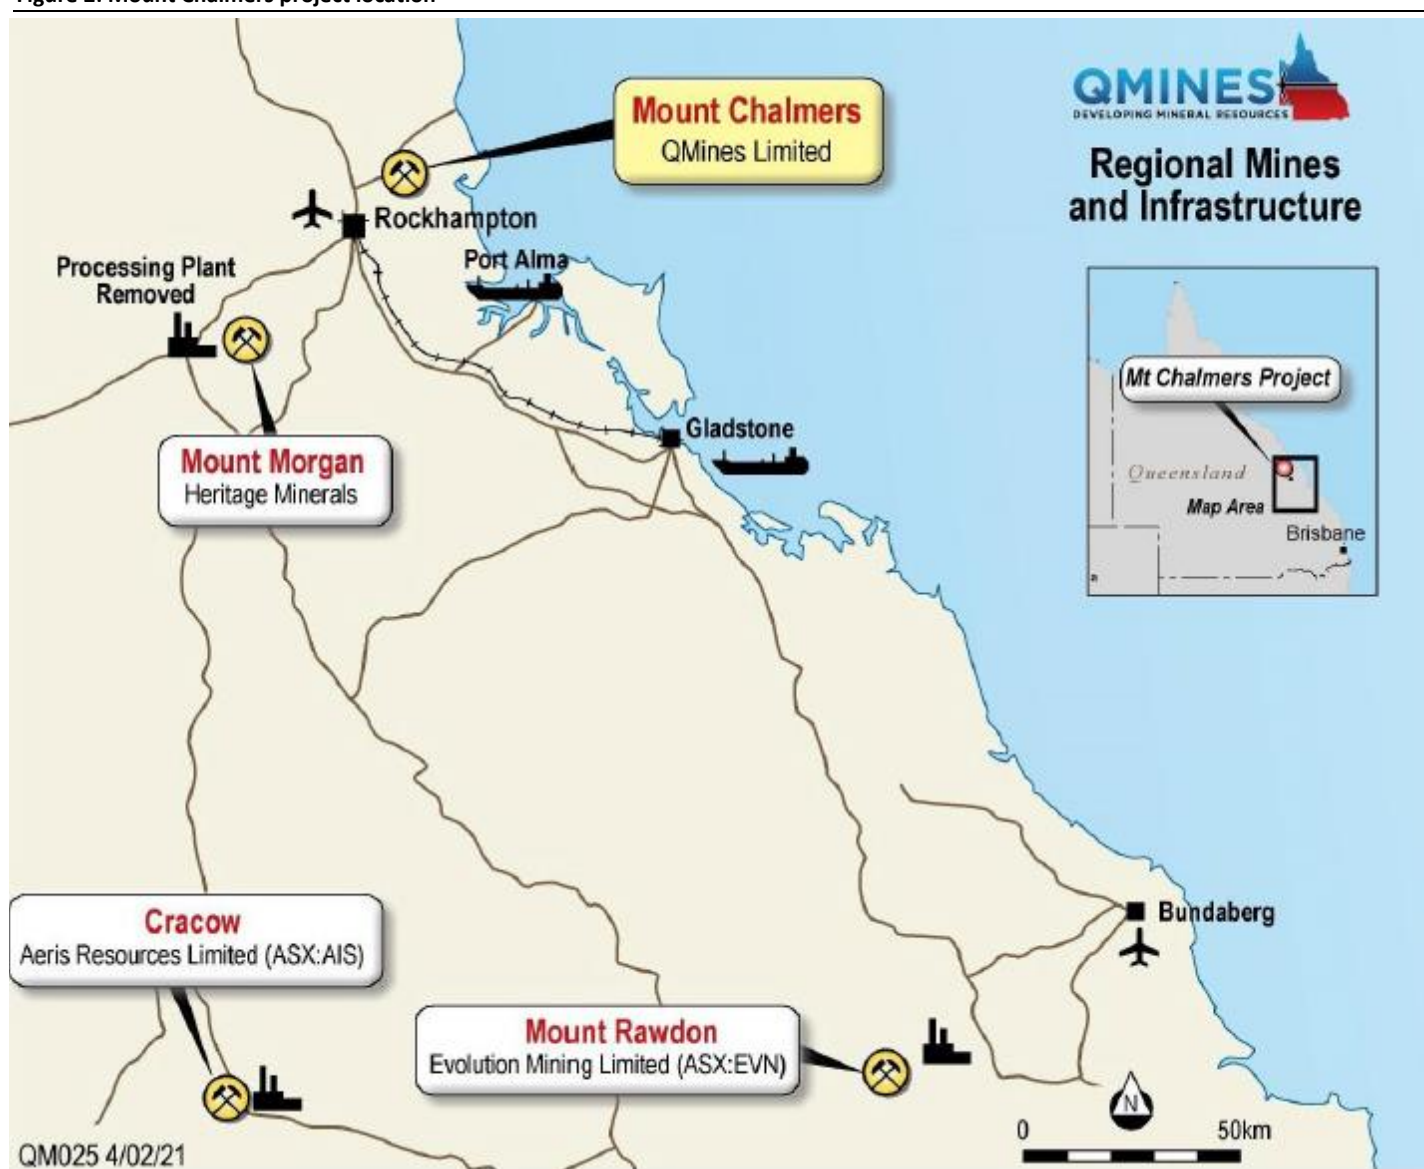

The mine was last operated by Mount Morgan between 1979 and 1982 before closing because of low commodity prices.

The deposit is a volcanic hosted massive sulphide deposit (VHMS) and the system contains copper, gold, silver, lead and zinc mineralisation. The mineralisation is near surface and open in all directions.

Mount Chalmers currently has an inferred resource of 3.9Mt @ 1.15% CU, 0.81g/t Au and 8.4g/t Ag for 71kt of contained copper equivalent. QMines has an objective of increasing the resource to around 200kt of copper equivalent over the next two years through a 30,000m drilling program.

QMines is intending to rapidly expand and upgrade the existing Mount Chalmers resource and return the mine to production.

Figure 2: Mount Chalmers project location

### Drilling update October 2021

The company has today announced the results of 35 holes totalling 3,498m of drilling. The 30,000m drilling program is ongoing with two rigs active. High grades have been intersected in multiple drill holes from including;

- 41.51 g/t Au and 7.16% Cu from hole MCDD017,
- 17.4 g/t Au and 5.13% Cu from hole MCDD018,
- 2.45 g/t Au and 11.65% Cu from hole MCDD015, and
- 7.2g/t Au, 224g/t Ag, 6.18% Pb and 33.9% Zn from hole MCRC001.

The mineralisation has been encountered outside the existing resource which remains open in all directions. Qmines has drilled several of these holes in previously untested area on the western side of the main pit. These results are highly encouraging and suggest Qmines is on-track for a resource upgrade before the end of CY21 as planned.

QMiners has reworked and digitised historical soil sampling in the region and has identified four strong exploration leads at Striker, and at three locations to the west of Mount Chalmers (T1, T2 and T3).

QMiners is also intending to explore for additional mineralisation near the existing Mount Chalmers open pit, particularly along strike and down-dip of the existing resource. The company has advanced exploration targets at Woods Shaft, Botos and Mt Warminster.

### Valuation and Copper comparables

The following table outlines a number of companies which could be considered 'peers' for QMines. On an EV/t of copper resource basis QMines is trading at \$459/t, which is a 22% discount to the peer comparables.

We have set our price target and valuation of QMines at A\$0.72ps, which is based on the company successfully increasing its resource to 120kt in the current exploration program and trading at A\$589/t in-line with its peer average.

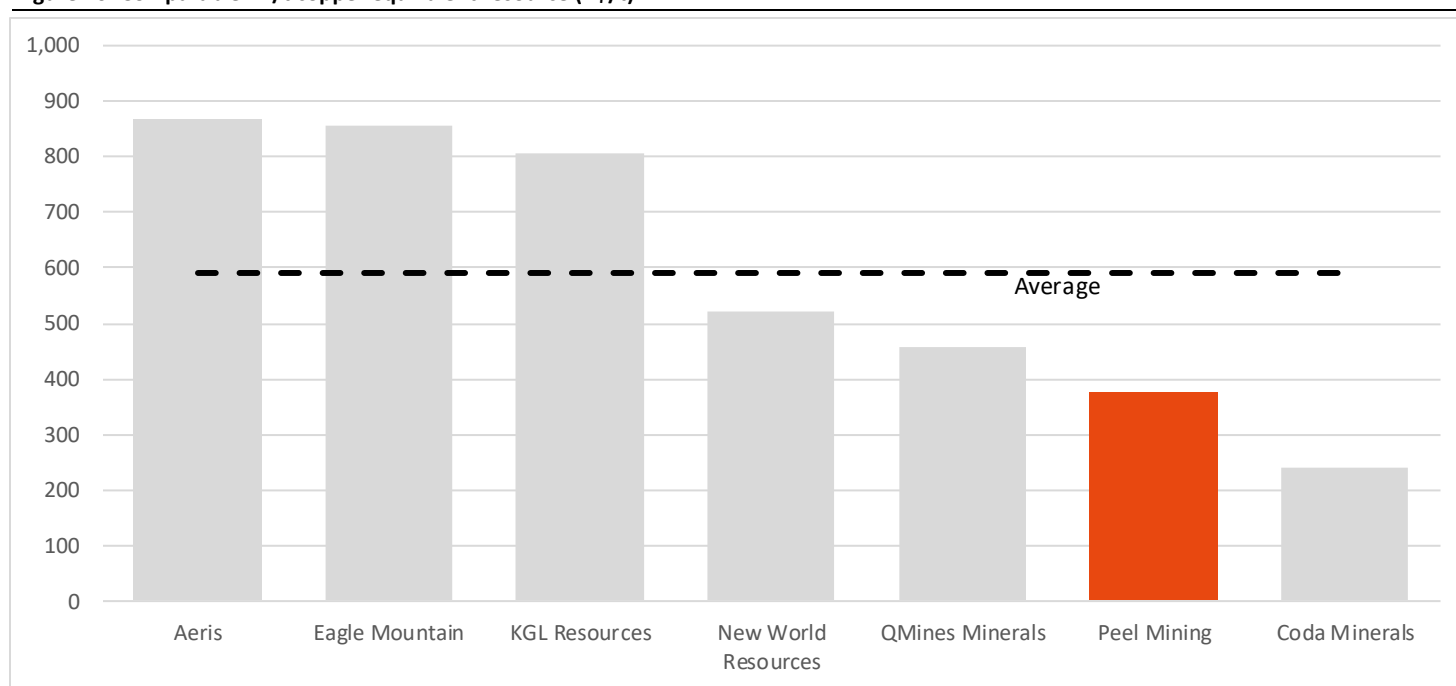

We have not built a financial model of a potential development at Mount Chalmers. Following further exploration success, the company is likely to move to scoping and pre-feasibility studies in late 2022.

### Key risks

- Qmines is predominantly an exploration company and therefore carries significant exploration risk. There is no guarantee that future exploration results will be positive.
- The Mount Chalmers Copper Project is not yet producing and there is a risk that Qmines is unable to bring the operation in to production. The project may cost more than expected to build and may not operate as expected.
- Smaller companies carry more significant 'key personnel' risk than larger organisations. If senior management depart the company then it could delay projects or exacerbate operational risks.
- The copper price is currently trading well above cost curve support and there are risks that if demand for copper does not meet expectations then the copper price could revert to historical averages.

### Core drivers and catalyst

- Mount Chalmers currently has an inferred resource of 3.9Mt @ 1.15% CU, 0.81g/t Au and 8.4g/t Ag for 71kt of contained copper equivalent. Qmines has an objective of increasing the resource to around 200kt of copper equivalent over the next two years through a 30,000m drilling program.
- Mt Chalmers is a Volcanic Hosted Massive Sulphide (VHMS) deposit. These deposits are typically characterised by multiple deposits within a cluster. Qmines technical team believe there is strong potential of finding further VHMS mineralisation around the existing mine site.
- The company is expected to regularly release drilling results over coming months and is expected to release an updated Mount Chalmers resource in late 2021.
- Once the resource has increased to a reasonable size (150-200kt) we expect the company to move to scoping and pre-feasibility studies in late 2022 and into 2023.

## Rating Classification

<b>Buy</b>	Expected to outperform the overall market
<b>Hold</b>	Expected to perform in line with the overall market
<b>Sell</b>	Expected to underperform the overall market
<b>Not Rated</b>	Shaw has issued a factual note on the company but does not have a recommendation

## Risk Rating

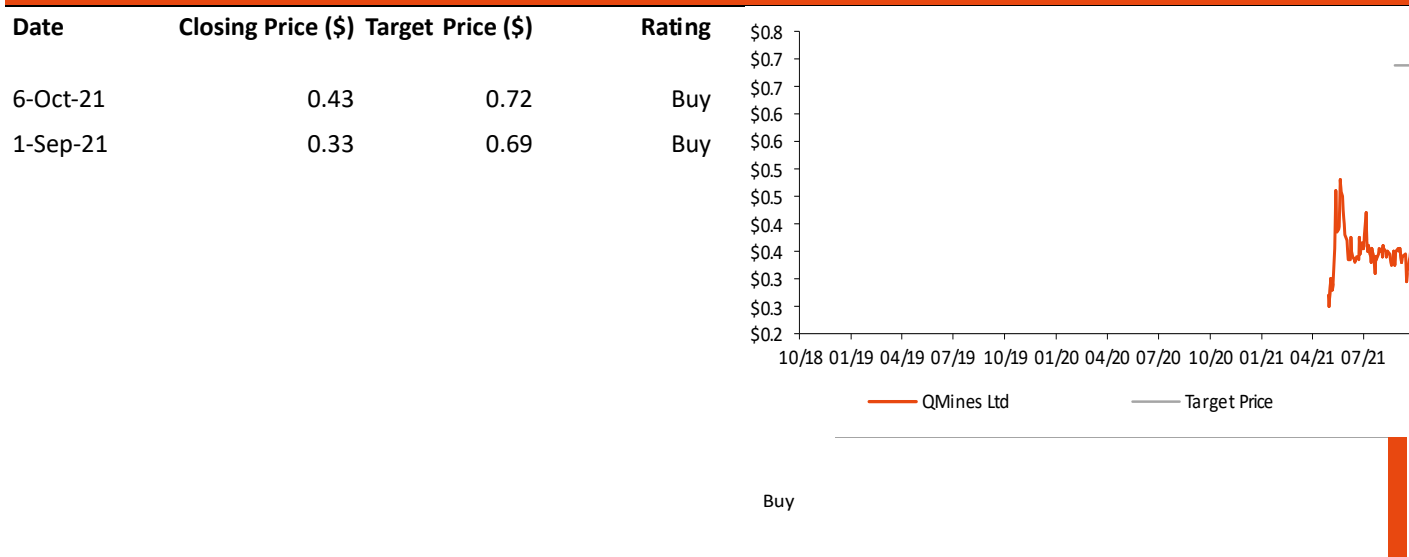

<b>High</b>	Higher risk than the overall market – investors should be aware this stock may be speculative
<b>Medium</b>	Risk broadly in line with the overall market
<b>Low</b>	Lower risk than the overall market

**RISK STATEMENT:** Where a company is designated as ‘High’ risk, this means that the analyst has determined that the risk profile for this company is significantly higher than for the market as a whole, and so may not suit all investors. Clients should make an assessment as to whether this stock and its potential price volatility is compatible with their financial objectives. Clients should discuss this stock with their Shaw adviser before making any investment decision.

## Disclaimer

Shaw and Partners Limited ABN 24 003 221 583 ("Shaw") is a Participant of ASX Limited, Chi-X Australia Pty Limited and holder of Australian Financial Services Licence number 236048.

**ANALYST CERTIFICATION:** The Research Analyst who prepared this report hereby certifies that the views expressed in this document accurately reflect the analyst's personal views about the Company and its financial products. Neither Shaw nor its Research Analysts received any direct financial or non-financial benefits from the company for the production of this document. However, Shaw Research Analysts may receive assistance from the company in preparing their research which can include attending site visits and/or meetings hosted by the company. In some instances the costs of such site visits or meetings may be met in part or in whole by the company if Shaw considers it is reasonable given the specific circumstances relating to the site visit or meeting. As at the date of this report, the Research Analyst does not hold, either directly or through a controlled entity, securities in the Company that is the subject of this report, where they do hold securities those interests are not material. Shaw restricts Research Analysts from trading in securities outside of the ASX/S&P100 for which they write research. Other Shaw employees may hold interests in the company, but none of those interests are material.

**DISCLAIMER:** This report is published by Shaw to its clients by way of general, as opposed to personal, advice. This means it has been prepared for multiple distribution without consideration of your investment objectives, financial situation and needs ("Personal Circumstances"). Accordingly, the advice given is not a recommendation that a particular course of action is suitable for you and the advice is therefore not to be acted on as investment advice. You must assess whether or not the advice is appropriate for your Personal Circumstances before making any investment decisions. You can either make this assessment yourself, or if you require a personal recommendation, you can seek the assistance of your Shaw client adviser. This report is provided to you on the condition that it not be copied, either in whole or in part, distributed to or disclosed to any other person. If you are not the intended recipient, you should destroy the report and advise Shaw that you have done so. This report is published by Shaw in good faith based on the facts known to it at the time of its preparation and does not purport to contain all relevant information with respect to the financial products to which it relates. The research report is current as at the date of publication until it is replaced, updated or withdrawn. Although the report is based on information obtained from sources believed to be reliable, Shaw does not make any representation or warranty that it is accurate, complete or up to date and Shaw accepts no obligation to correct or update the information or opinions in it. If you rely on this report, you do so at your own risk. Any projections are indicative estimates only and may not be realised in the future. Such projections are contingent on matters outside the control of Shaw (including but not limited to market volatility, economic conditions and company-specific fundamentals) and therefore may not be realised in the future. Past performance is not a reliable indicator of future performance. Depending on the timing and size of your investment, your portfolio composition may differ to the model. Performance figures are derived from the inception date of the model and its investment transactions from that date, therefore the performance for your portfolio may be different. If you have any questions in connection with differences between your portfolio and the model, you should speak with your adviser.

**IMPORTANT INFORMATION TO CONSIDER:** It is important that before making a decision to invest in a Shaw Managed Accounts, a managed fund, an exchange traded fund, an individual hybrid security or listed debt instrument that you read the relevant Product Disclosure Statement ("PDS"). The PDS will contain information relevant to the specific product, including the returns, features, benefits and risks. The PDS can be found at: [www.shawandpartners.com.au/media/1348/shawmanagedaccounts\\_pds.pdf](http://www.shawandpartners.com.au/media/1348/shawmanagedaccounts_pds.pdf).

**RISKS ASSOCIATED WITH HYBRID SECURITIES:** Hybrid securities and listed debt instruments differ from investments in equities and cash products in a number of important respects. The liquidity risk associated with an investment in hybrid securities and listed debt instruments will generally be greater than that associated with equities. The credit risk associated with hybrid securities and listed debt instruments is higher than that of a cash product or term deposit. Some hybrid securities may be perpetual in nature, meaning that they can only be redeemed or exchanged for cash or equity at the issuer's option. Hybrids may also contain terms which automatically trigger the deferral of an interest payment or cause the issuer to repay the hybrid earlier or later than anticipated. ASIC has published information to assist consumers in understanding the risks and benefits associated with an investment in hybrid securities or listed debt instruments. This information can be found under the heading 'Complex Investments' at [www.moneysmart.gov.au/investing](http://www.moneysmart.gov.au/investing).

**DISCLOSURE:** Shaw will charge commission in relation to client transactions in financial products and Shaw client advisers will receive a share of that commission. Shaw, its authorised representatives, its associates and their respective officers and employees may have earned previously or may in the future earn fees and commission from dealing in the Company's financial products. Shaw acted for the company in a corporate capacity within the past 12 months for which it received a fee.
