carbonneutral 

Summary

Carbon Neutral was engaged by QMines to help measure their organisational Greenhouse Gas Emissions (GHG). GHG emissions from these activities are estimated to be 8.14 tonnes.

These GHG emissions have been offset through the retirement of accredited carbon offsets and any claims relating to carbon neutrality for the books are based on the information outlined in this report.

General Information and Scope

This assessment was conducted in tandem with Carbon Neutral Pty Ltd using information and data provided by QMines.

The veracity of this data is taken to be complete and accurate and has not been audited or independently verified by Carbon Neutral.

The six GHGs covered by the Kyoto Protocol: carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs) and sulphur hexafluoride (SF₆) are included.

Allowances and GHG Emissions

Allowances and GHG emissions arising from QMines Organisational operations are as follows.

Activity	Activity Data	GHG Emission (t CO ₂ -e)
Fleet (by Litres)	1281 litres	3.29
Fleet (by kms)	721 km	0.19
Energy	4230 kWh	3.76
Air Travel	517 km	0.28
Waste	0.1 t	0.16
Water	20kL	0.02
Office Consumables	\$1029.26	0.43
Food	\$27	0.01
TOTAL		8.14

Carbon Offsets

Details of carbon offsets retired to cancel out emissions associated with the book's production and distribution are shown in the following table.

Type of Offset	Tonnes Purchased & allocation date
Biodiverse Reforestation Carbon Offsets	
CDM CER - China Wind-farm Project - Renewable Energy, Vintage 2013-2016	
Serial No.'s:	12PWA176641B - 12PWA176675B CN-316 1,011,041,042 - 1,011,041,076 -
TOTAL tonnes retired	35
NET GHG Emissions after Offsetting	-26.86 t CO₂-e
